

FOILING

SURFACE PROTECTION FILM FOR ANODISED COMPONENTS

BWB's surface protection film protects anodised components indoors and outdoors. The film prevents damage and contamination during transport, further processing, storage and assembly. We offer our customers at the Altenrhein and Büren a.A. sites the foiling of anodised profiles for architectural applications.

ADVANTAGES

- Protection against the effects of weather
- Protection during further mechanical processing
- Removal without residues

APPLICATIONS

The foil is specially designed for use in the construction industry. It protects the profiles during storage and further processing. The protective film must be removed within a maximum of three months.

Maximum dimension: 7500 x 250 x 120 mm
Minimum dimension: 500 x 20 x 20 mm
