FINISHES

E0 Degreasing & Deoxidising	E1 Grinding	E2 Brushing	E4 Grinding & Brushing	E6 Etching & Matting	E7 Chemical polishing	F1 Decorative blasting	F2 Pralox® Surface treatment
The raw character	A fine matt effect	A light structure	The elegant structure	The extreme matt effect	A brilliant shine	A velvety surface	BWB's specialLe treatment

BWB Surface Technology provides you with a wide range of colours to choose from. It is technically not possible to graphically replicate the exact colour of the anodised aluminium. For a correct colour assessment, we therefore recommend sampling with original parts and with the intended aluminium alloy.

WE'LL BE HAPPY TO ADVISE YOU ON YOUR PROJECT

Do you need a sample for your project or do you have questions about the selection of colours and finishes?
