

INOXAL

ALUMINIUM IN STAINLESS STEEL LOOK

For more lightness in architecture - Inoxal refined aluminium is an attractive alternative to brushed stainless steel.

Aluminium offers maximum design freedom for sophisticated architecture. In contrast to steel, individual profile shapes and designs can be developed quickly and cost-effectively. The low specific weight of aluminium relieves the load on the supporting structure and reduces the assembly effort considerably. The Inoxal anodisation gives the façade lasting protection and a timeless appearance.

Inoxal surface finishes (from left to right): Etching (E6), grinding and brushing (E4) and rough grinding

ADVANTAGES

- Up to 65% weight reduction compared to a steel façade
- 100% UV-resistant and non-fading
- Highly durable
- Weatherproof and low-maintenance
- 100% recyclable and non-toxic
- More streamlined handling and assembly

APPLICATIONS

Inoxal can be applied to all aluminium components that are labelled as being suitable for decorative anodising

- Extruded aluminium profiles
- Aluminium sheets and plates
- Aluminium expanded metal

Maximum component size: 8000 x 750 x 2500 mm
