

PRALOX

FOR THE HIGHEST AESTHETIC DEMANDS

Pralox refined surfaces combine aesthetics with chemical and mechanical resistance.

With Pralox finishing, the aluminium surface is microprofiled before oxidation. Applicants and end users enjoy the extremely aesthetic surface structure of Pralox-finished aluminium parts, optionally from matt to glossy.

NX-2 table clock of the Battenberg Foundation

ADVANTAGES

- Very large colour selection
- Freely selectable gloss level
- High wear resistance
- High chemical resistance
- High corrosion resistance
- Easy to clean
- Good grip

APPLICATIONS

Pralox coatings are suitable for applications with the highest aesthetic demands:

- Medical technology
- Optics
- Electronics
- Design
- Watches and jewellery
- Mechanical engineering

Maximum component sizes: 1000 x 400 x 800 mm
