

SILVER PLATING

OPTIMISED CONDUCTIVITY

BWB specialises in the production of functional coatings to improve the electrical conductivity of components.

Silver coatings are applied by electroplating, whereby BWB dispenses with metallic gloss additives in order to minimise electrical resistance and optimise conductivity.

ADVANTAGES

- Improved conductivity
- Protection against corrosion
- Decorative surface
- Good biocompatibility
- High abrasion resistance

APPLICATIONS

Technical silver plating is of great importance in the following industries:

- Electrical engineering
- Electronics
- Chemical industry
- Mechanical engineering

Maximum component sizes: 1100 x 400 x 700 mm

For further information, please contact the **BWB** team in confidence.
